

Child Safe Blinds

We are now able to offer blinds which have taken safety into account in their design especially for children and venerable people.

All our blinds come with warning labels. In addition, all blinds are supplied with a cord /chain tidy.

Generic warning hang tag

WARNING

Young children can strangle in the loop of pull cords, chain and bead cords, and cords that run through window coverings. They can also wrap cords around their necks. To avoid strangulation and entanglement, keep cords out of the reach of young children. Also,

1. install safety devices that remove the cord loop or reduce access to cords, and
2. move cots and furniture away from window covering cords.

Operational hang tag (for a tension device)

WARNING

The tension device reduces the hazards of strangulation or entanglement by limiting access to the cord or bead chain.

Anchor the device with the cord or bead chain to the wall or floor, so young children cannot pull the cord or bead chain around their necks. Always keep cords out of the reach of young children.

Push and Pull for Pleated Blinds

These blinds are now suitable for a child’s bedroom as the cords are attached to the window sill and the blind is raised and lowered with a handle. The blind can be stopped in any position.

Vertical Blinds

We now have a wand control called The Easy Glide System. The system eliminates the need for cords. The blinds are opened and closed by pulling the wand across the window. To change the amount of light entering a room, rotate the wand to the desired position. NB The wands are the full length of the drop of the blind.

If you already have these blinds installed you can add an easy fit control guard. It can be used on Roller, roman and vertical blinds.

Venetians Blinds

The Uni Wand combines tilting, raising and lowering using one control. When the blind is raised, lift cords can be wrapped around a cleat attached to the wand.
